Completed class 10th with a CGPA of 8.6.

PROJECTS UNDERTAKEN

✓ ONLINE COLLEGE PLACEMENT SYSTEM

It is a Web-Based System made for easy accessibility of students and the campus recruiters for the recruitment system.

It was made developed using Handlebars framework for front-end development, Express.js as server-side framework and MongoDB as Database.

Project Repository link: <https://github.com/kuntal305/Online-college-placement-system>

✓ "DOCTOCITY" - ONLINE DOCTOR APPOINTMENT AND HEALTH CHECKUP

It is a Web-Based project made using the well-known web framework – **Angular4**, and on the backend, the serverless database – **Angular Firebase**. This progressive web app is names as *DOCTOCITY*.

This will be an online platform for users to book appointments with the doctor of their choice and requirement, and book diagnostic test for themselves. This is made for ease of usage and accessibility.

The common users have to login and select their desired appointment/test.

There will also be an interface for the clinics and doctors where they will be able to interact with appointment process.
